

For immediate release

St. John's Newfoundland. - Aug. 2015 - Walsh's Philatelic Services announces the release in electronic form of the award winning *Walsh Newfoundland Specialized Stamp Catalogue* (NSSC) and its 'mate' *Walsh British North America Specialized Catalogue*, 10th edition. These eCatalogues continue to provide volumes of philatelic information and offer much more than just price changes! A study of these full-colour pages reveals in-depth detail beyond any other catalogue on the market. The tradition of providing colour images to go with the presented detailed descriptions continues. The forward thinking Walsh cataloguing format provides easy viewing for each issued value of British North America from 1851 to 1951.

A noted Newfoundland historian, Colin Lewis opines, “this catalogue is an asset in all areas and a must-have reference for serious collectors and postal historians, as well as professional dealers.” In this edition besides the regular variety updating, can be found numerous listings for unissued essays, die proofs and colour trials with many having images attached. Continuing with fresh uninhibited thinking, as was demonstrated in the 9th edition 2014, concerning the rouletted 1876 stamps placement, the Newfoundland Catalogue edition takes on a new challenge. Featured on side by side pages are the impressive major catalogue re-workings for the never-before-manner of detailing Newfoundland's 1897 Trial Surcharges and Surcharged Overprint issue. New research insights on some of the first flight covers are presented. And within this 737 page tome is research offered by Sammy Whaley on his Cents issue covers. Closing out the catalogue are several revealing articles.

Its comprehensive mate, *Walsh British North America Specialized Catalogue*, is no slouch! It continues to detail information not to be found in other catalogues. It brings inside the covers of its 624 pages the many unissued attempts that tempt Canadian collectors, so that they do not have to search far afield. These are the trial essays of: Colony of Canada, Large Queen, Small Queen and MacDonald Cartier designs. The one-location listing for airmail flights of both the semi-official and the authorized Canada Government Official Airmail Flights is a boon to airmail collectors. The stated revenue stamp section with its imaged die proof listings certainly enhances the ability of revenue collectors to have that information close at hand. And as the Canadian historian Ron McGuire suggests, “all are contained in a specific location; no more having to search elsewhere.”

Both of these eCatalogues will be found at www.nfldstamps.com where sample pages are provided. You will be directed to lulu.com site where the download files are acquired and sent.
